

## User Guide

1. Switch the Bluetooth on the phone "on". If the Bluetooth is not switched on the app will not start up and the phone will display a message to switch the Bluetooth on and start the app.
2. Switch the boat "on". If the boat is not switched on, a message of "not connected" will be displayed. In this case switch the boat "on" and then restart the app.
3. Sometimes the Bluetooth takes 2 or 3 attempts to connect. So sometimes you may have to restart the boat and app in order to get it connected. Once the Bluetooth is connected, a message "now connected" is displayed.
